

VOLTSTAR™
FRIDGEGUARD
 — AVS5A

Low Voltage

Spikes/Surges

Power-Back Surges

Basic Lightning

Nominal Voltage	230V
Current Rating	5Amps
Frequency	50/60Hz
Under-Voltage Disconnect	185V
Under-Voltage Reconnect	190V
Spike Protection	160J
Wait Time	90seconds

→ Protects against low voltage, brown-outs and voltage dips. These conditions are harmful to fridges, freezers, pumps and all motor equipments.

By disconnecting the power when it is bad, the FridgeGuard safeguards against short term and long term damage to ensure higher efficiency from your appliances. 90 seconds start-up delay is built-in to protect against frequent fluctuations to ensure proper compressor shutdown and start-up.
