

## AVS13 micro APPLIANCE GUARD Automatic Voltage Switcher

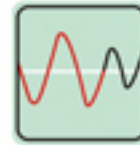

Low Voltage

High Voltage

Spikes/Surges

Power-Back  
Surges

Basic  
Lightning

Nominal Voltage	230V
Current Rating	13Amps
Frequency	50/60Hz
Under/over-Voltage Disconnect	185V/260V
Under/over-Voltage Reconnect	190V/258V
Spike Protection	160J
Wait Time(User adjustable)	1.5mins to 3 mins

→ Protects against high and low voltage, brown-outs, power back surges and voltage dips. These conditions are extremely harmful and damaging to electrical and electronic equipment. By disconnecting the power when it's bad and reconnecting automatically on return of normal power, the AVS13 Appliance Guard safeguards and protects against short term and long term damage to ensure longevity of your appliances, especially air conditioners and refrigeration equipment.

Reconnection takes place after a start-up delay to protect against frequent fluctuations.

### Protection for all electrical and electronic appliances

The AVS can protect a number of appliances, using a multi-way socket.
